I find xm satellite weather and traffic to be the most up to date and accurate reporting that I have found. Due to the lack of quality and to the point information provided by Radio and television I have become dependent on the xm radio no nonsense or whimsical traffic info, it is immediate and I have avoided numerous traffic tie ups. I feel its unfair to prevent a premium reliable service such as XM Satellite to broadcast pertinent info. radio and TV traffic and weather is a joke and it is never up to the moment.
